PROJECTS

1. Automatic Number Plate Recognition using Image Processing in MATLAB

- The image was first pre-processed to make it suitable to perform image processing.
- The steps involved are first detecting the location of the number plate, then cropping the number plate, then extracting and then identifying the numbers on the number plate.
- The program had an efficiency of about 75%.

2. Student Database Management Program

- The program stores the details of students in a text file.
- It can also add new data, update, search and display existing data.
